♦ Able to add advertisement for scale manufacture. Adopt special encryption technique which is difficult to break

♦ With multi-functional PC software and friendly operation menu. One key setting function which is convenient for mass setting

♦ Standard current loop and full-duplex communication interfaces; automatic selection for communication protocol and baud rate

Standard function

♦ Advertisement: 5 normal advertisements + 2 startup advertisements + 2 encryption advertisements

♦ Advertisement running method: up-down and left-right available, optional multiple effects

♦ Advertisement running speed: 10 levels of speed optional

♦ Advertisement letters: each advertisement can have 63 Chinese character or 126 English letter

♦ Weight unit:13 kinds, like: Kg, t, lb, N etc

*T*echnical parameter

♦ Display territory: 640mm ×160mm x 64mm ×16 dot-matrix LED

♦ Working voltage: AC 100 - 240V

♦ Working/ storage temperature: -20℃~50℃ -35℃~65℃

♦ Clock accuracy: daily error less than 1 seconds

♦ Temperature range: - 42℃~99℃, accuracy around ±2℃

♦ Communication interface:

　　　a) Current loop interface: connected with indicator, transmitting distance ≤1200m

　　　b) RS232 interface: connect with computer and indicator, transmitting distance ≤0m

　　　c) RS485 interface (optional): connect with computer and indicator: transmitting distance≤1000

♦ Keypad: two light-touch keys

♦ Appearance: 780×260×60mm

♦ Weight:5.6kg
